

Harvest Carts

By HPNE

Eliminate
awkward handling

Avoid putting
stress on bags

Start using
a functional,
process-minded
product to manage
your fluids

Our Harvest Cart, an inspired product from HPNE, is an ideal solution for managing your bag storage throughout your bioprocess. Eliminate awkward handling, avoid putting stress on bags, and start using a functional, process-minded product to harvest your fluids.

Our Harvest Cart is available in custom models and each shelf is large enough to hold 50-liter 2D bags for convenient storage.

Features & Benefits:

- Sloped shelves at 5 degrees to allow for fluid drainage
- Can accommodate up to 6 full bags, custom models also available
- Separate buffer to smaller volumes for reduced contamination
- Ability to be modified to your individual needs
- Custom models can be designed to order with the following options:
 - Weigh scale shelves
 - Hydraulic shelves that can be raised and lowered
 - Heated shelves
 - All shelves are removable and can be changed out for a shelf to hold other items such as pumps, sensors, tube welder, etc.
 - Bolt-on Electric Tug Hitch (Available for MasterMover)
 - Bolt-on hook assemblies for hanging additional bags
 - Bolt-on clamp for hanging cell bags
 - Bigger wheels for more stability
 - Two rigid and two swivel-lock washdown casters with SS frame/wheel bearings
 - Ability to lock wheels
 - Rubber grips on handles
 - Narrower cart design for more confined spaces
 - Cover for protecting light sensitive products
