

MaxxMover

Mobile Protective Frame

Our MaxxMover is a unique solution that allows for the effortless transportation of drums, tanks, and other cylindrical equipment in a Biopharmaceutical cleanroom environment.

MaxxMover is a solution born out of an obvious challenge faced by most in a cleanroom environment - relocating heavy pharma equipment that is mounted on wheels.

Features and Benefits:

- Stainless steel protective frame to protect load
- Allows for smoother handling of products
- Customizable for all tank or drum volumes
- Large wheels to prevent shimmying while transporting products
- Completely sealed frame for easy cleaning
- Sizable castors to fit any object
- Ability to also work in tandem with our electric tugs
