

Media & Buffer Storage and Handling Solutions

HPNE has a wide range of solutions to help optimize the storage and handling of your media & buffer. Our wide range of solutions including electric tugs, 2D bag storage systems, stainless steel and rigid plastic harvest carts, as well as spool trolleys, will cater to your specific needs.

Bioprocess Containers

Cleanroom Bioprocess Containers

Our AllpaQ Cleanroom Bioprocessing Rigid Containers can help optimize your bioprocessing storage for media & buffer for your cleanroom environment.

Topdrain Bioprocess Containers

Our AllpaQ Topdrain Bioprocessing Rigid Containers can help optimize your bioprocessing storage for media & buffer for your cleanroom environment.

Shipping Bioprocess Containers

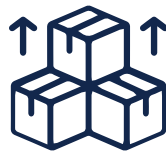

Our AllpaQ Genesis Shipping Containers are the most efficient way to ship fluid while protecting your assembly.

Rigid Polypropylene Bioprocess Containers

Our AllpaQ Rigid Liquid Bioprocess Containers are created specifically for use in a cleanroom environment for the safe and easy transportation of fluids.

Range of Sizes
Built to your
bag specification

Stackable and Collapsible
Save valuable space
in your environment

Easy Movement
Easily load or unload with
forklift or pallet jack

2D Bag & Tubing Storage Solutions

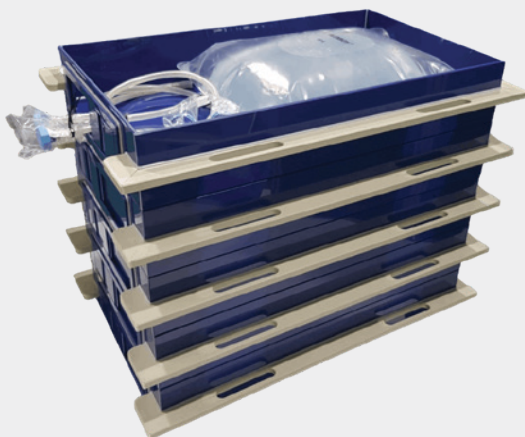

Stainless Steel & Rigid Plastic Harvest Carts

Our harvest carts will optimize the storage and handling of your 2D bioprocessing bags, while also allowing for more manageable and smoother fluid drainage.

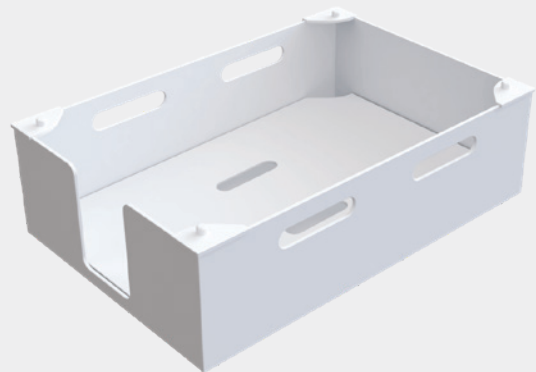

Lightweight Rigid Plastic Spool Trolley

Our spool trolleys offer tubing storage of multiple spools in a vertical tower to reduce your footprint. Trolleys come complete with a work shelf on the rear for cutting necessary lengths and final prep of connectors.

UV Stabilized 2D Tray

Our ALLpaQ UV Stabilized 2D Trays eliminate the threat of cellular structure damage to your 2D bioprocessing bags from high levels of harmful UV light.

Lightweight Rigid Plastic 2D Bag Tray

Enhance individual and manifold bag handling in your biopharma manufacturing processes with our ALLpaQ 2D Bag Trays.

Handling Solutions

Electric Tugs

Our electric tugs are battery operated and designed to reduce the stress of moving heavy equipment around your facility. Our stainless steel electric tugs are perfect for your cleanroom environment or biomanufacturing space.

- Eliminate manual handling
- Compact footprint
- Maximize suite uptime

Our Range of Electric Tugs Include,

- SM100 Plus: moves up to 2,600 lbs.
- SM200+ SS: moves up to 4,400 lbs.
- MasterHandler MH400+: moves up to 8,800 lbs.
- MT5/400+ SS: moves up to 8,800 lbs.
- MT20/1200+ SS: moves up to 26,000 lbs.

MaxxMover

Our MaxxMover is a cylinder cart designed for the effortless transportation of drums and tanks in a biopharmaceutical cleanroom environment.

- Use an electric tug to move barrels and cylinders
- Optional stainless steel frame
- MasterMover coupling standard

SM200+ SS
