

JOINT AUDIT PROGRAM[®]

Overview

Rx-360 is a non-profit, member-driven consortium with a mission based in pharmaceutical supply chain integrity, material quality, and patient safety. As part of the consortium, Rx-360 offers a unique Joint Audit Program[®] that is open to the entire pharmaceutical industry but has significant advantages and discounts for Rx-360 members.

Our best-in-class program provides you with the unique opportunity to:

License existing audit reports.

Rx-360 maintains a vast library of audit reports that we have conducted over the years. As part of our program, these reports are available for the pharmaceutical industry license. **As a partner with High Purity New England, through licensing the report of one of our facilities, you can reduce your audit expenses while still maintaining a high degree of quality. The Rx-360 license library can be found at <https://rx-360.org/licensable-audit-reports/>.** You don't have to be a member of Rx-360 to license a report, but being a member provides you with significant discounts.

Sponsor or confidentially co-sponsor audits.

You can access our team of professionals to develop the audit scope, select an auditor that fits your needs, and reduce your costs through our proactive approach to finding confidential co-sponsors.

Post-audit CAPA management.

Utilize Rx-360 to help in reducing follow-up as part of our hands-on CAPA management initiative.

Host an audit.

At no cost to you, your organization can have an audit scheduled and executed at your site. This is a great way to have the subsequent audit report included in our license library. Through the licensing of that report, your associated burden and cost of hosting future audits is greatly reduced.

As members of Rx-360, you can enjoy the benefits that have been exclusively set up to optimize your audit needs and reduce expenses. Members-only programs and benefits include:

- **50% discount on licensable audit reports**
- **Enrollment in our Rx-360 Credit Program.** This program allows you to accumulate dollar for dollar credits based on your program utilization and sponsoring of audits. For a view of how this program has benefited other companies, you can view our case studies at <https://rx-360.org/newage-case-study/>.
- **Access to our members-only audit portal, auditsPlus®.** This portal is specifically designed for your company and allows you to track your Rx-360 audits, request licenses, and request for an audit to be scheduled.
- **Opportunities to develop new audit checklists.**
- **Participate in members only discussion groups** on pharmaceutical quality, audit trends, and best practices.
- **Waived administrative fees** for audit and license transactions, as well as on-demand receipt of your licensed report.
